Aim of this research work

Research data as a reflection of a research activity or as a performance indicator?

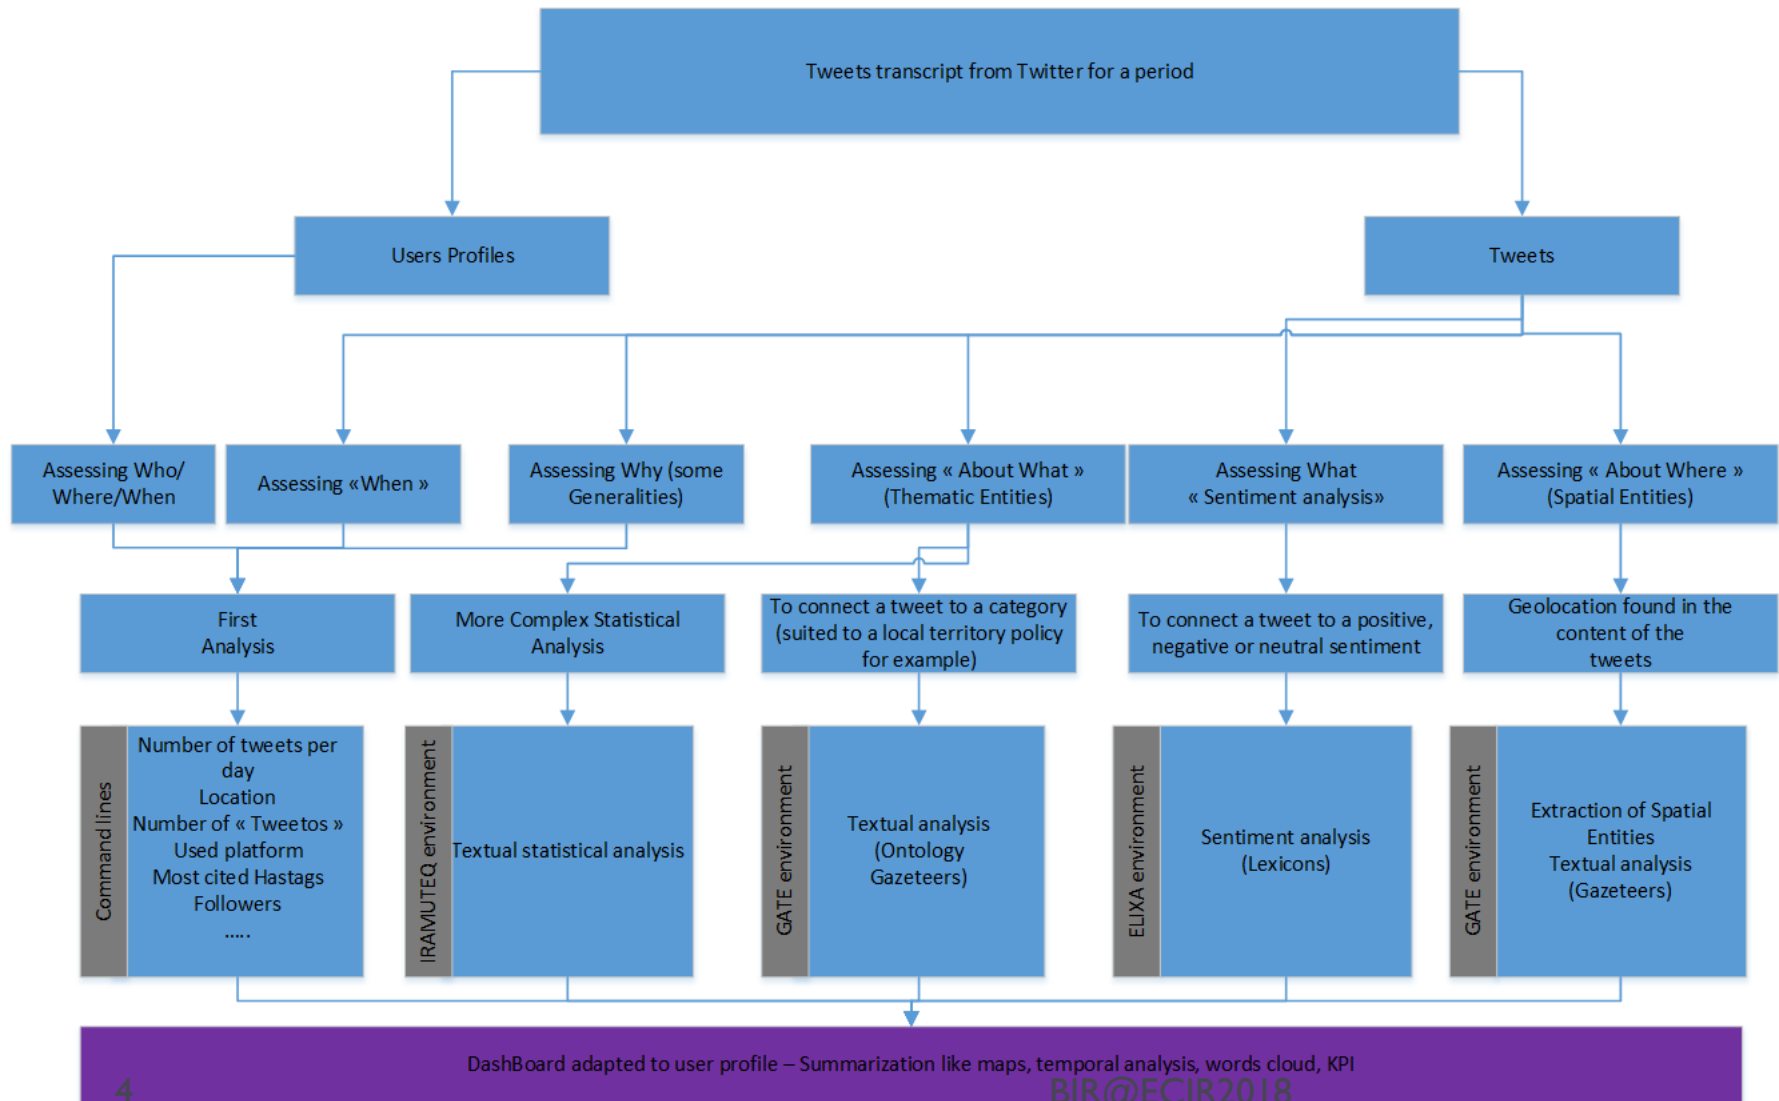

The 5W dimension

Who
Where
When
What
Why

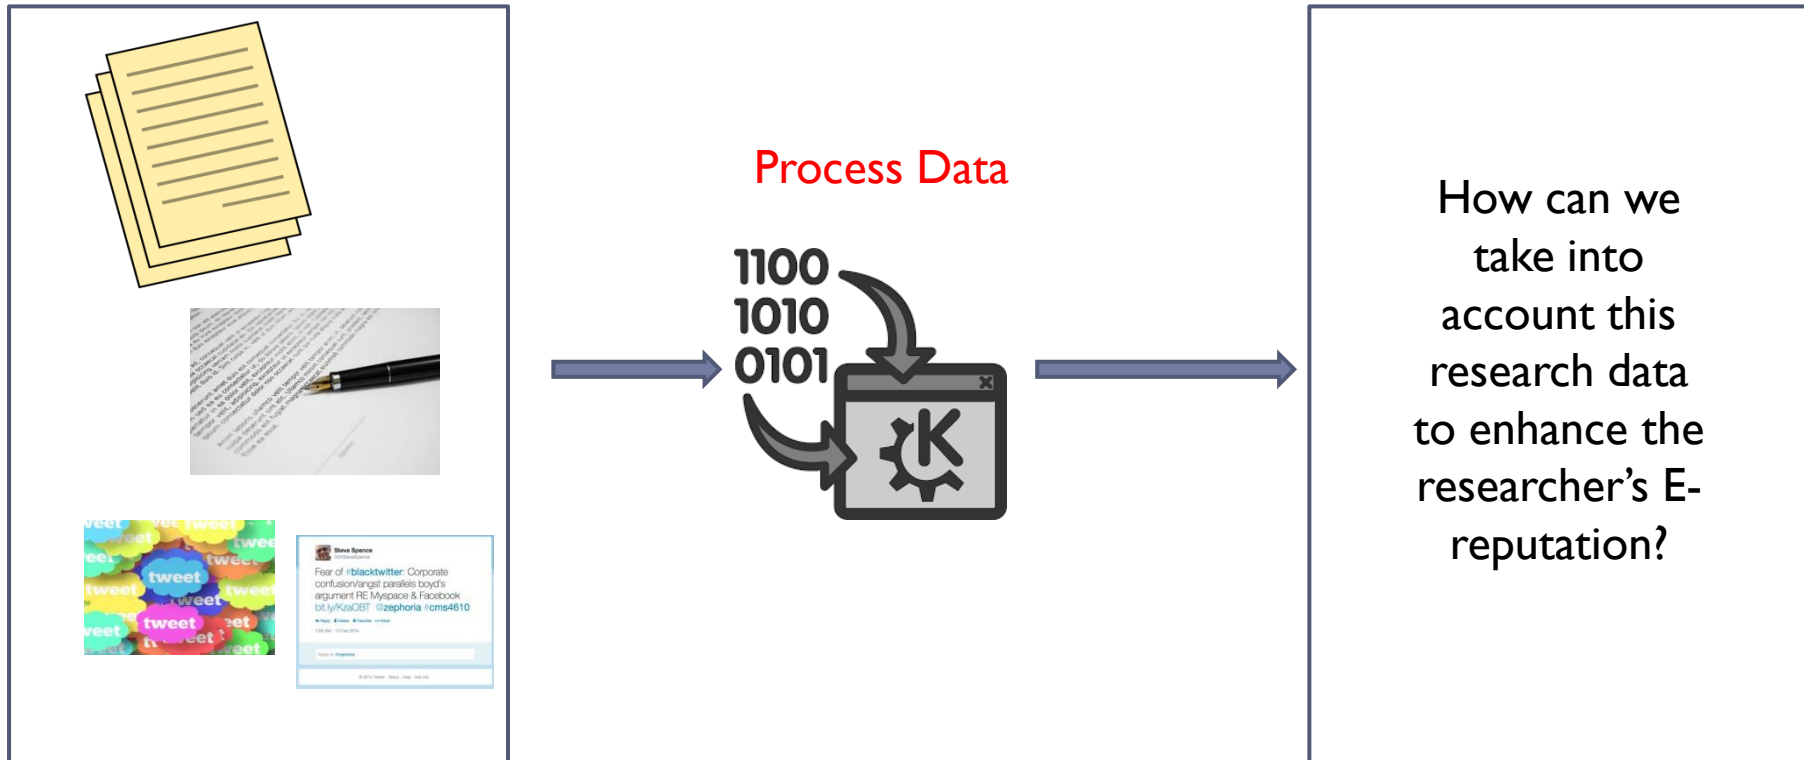

**Five important questions about
the content of Research data**

To help researchers in the domain of HSS to analyse their research data

A generic framework

Extension of this research work

textual document

Research data

***Research data as a reflection of a
research activity or as a performance
indicator (Almetrics)?***

Research Questions?

- ▶ How to encourage the adoption of data management best practices throughout the data life cycle by HSS researcher?
- ▶ How to give a reputation to their data sets?
- ▶ How to make the research data retraceable for others for verification purposes and for making them reusable beyond the original purpose for which they were collected.
- ▶ How to design a generic toolbox for HSS researcher in order to perform and analyse their research data
